

17TH INTERNATIONAL CONFERENCE ON HYDROGEN PRODUCTION

FOR A SUSTAINABLE ENERGY FUTURE

December 17-19, 2026

De La Salle Lipa

WHAT IS ICH2P?

ICH2P is dedicated to research and technologies for the production of hydrogen by various methods - thermal, chemical, biological, and its use in modern systems, including fuel cells. This also features talks by keynote, invited speakers, and industry experts, as well as oral and poster presentation academic participants. Conference proceedings will be published on the website after reviewing the manuscripts submitted. High quality papers will be considered, in expanded form, for possible publication in specific reputable international journals mentioned on the conference website.
